## EDUCATION

---

- |  |                    |                             |
|--|--------------------|-----------------------------|
| <b>University of Texas</b>   | <b>Austin, TX</b>  | <b>Sept 2017 – May 2019</b> |
| <ul style="list-style-type: none"><li>• M.S. in Computer Science. (GPA: 3.88/4.00)</li></ul>   |                    |                             |
| <b>University of Wisconsin</b>   | <b>Madison, WI</b> | <b>Sept 2010 – Dec 2014</b> |
| <ul style="list-style-type: none"><li>• B.A. in Computer Science. (GPA: 3.74/4.00)</li><li>• B.A. in Economics with Honors. (GPA: 3.85/4.00)</li><li>• B.A. in Mathematics. (GPA: 3.81/4.00)</li></ul> |                    |                             |

## WORK EXPERIENCE

---

- |   |                                       |                                  |
|---|---------------------------------------|----------------------------------|
| <b>Cloud Architect Engineer</b><br>Omnia storage team   | <b>State Street Financial Service</b> | <b>June 2019 – Current</b>       |
| <ul style="list-style-type: none"><li>• Developing auto-deployment system of IBM Cloud Object Storage in multi-site clusters using <a href="#">Ansible</a>, <a href="#">Docker</a></li><li>• Leading development of a distributed workload generator and performance benchmark toolkit written in <a href="#">Go</a></li></ul>  |                                       |                                  |
| <b>Software Engineer Internship</b><br>HPC infrastructure team  | <b>Schlumberger</b>                   | <b>May 2018 – August 2018</b>    |
| <ul style="list-style-type: none"><li>• Implemented a monitoring component of the in-house High-Performance Computing (HPC) engine in <a href="#">C++</a> to provide the fault tolerance and handle the “straggler” problem</li><li>• Employed SGD algorithm to dynamically learn the best timing for backup executions of the in-progress tasks based on the computation task characteristics</li><li>• Built a <a href="#">C++</a> code generator that automatically generates the application layer code based on the engine API</li></ul>   |                                       |                                  |
| <b>Software Engineer</b><br>Db2 LUW federation team   | <b>IBM</b>                            | <b>August 2015 – August 2017</b> |
| <ul style="list-style-type: none"><li>• Constructed <a href="#">Hive</a> and <a href="#">Impala</a> wrappers with <a href="#">C++</a> and <a href="#">Java</a> to support federation database between traditional RDBMS and Hadoop-based data warehouse solution</li><li>• Created automated setup tools with <a href="#">Shell</a> that reduce product configuration time by 75%</li><li>• Enhanced server option optimization tools using <a href="#">C</a> to reduce federation database performance tuning time by 90 % and enable the capability of tuning the product against Hive, Impala, and Spark</li><li>• Resolved over 20 defects, including a severe memory leak issue that impacted a \$1.6 million deal</li></ul> |                                       |                                  |

## SPECIALIZED SKILLS

---

- **Languages:** C++, C, Python, Go, Rust, Shell, SQL, Java, Lisp, MATLAB
- **Software:** CMake, Autotools, QEMU, Docker, Tensorflow, Keras, Git, ClearCase, Hive, Impala, Hadoop
- **Graduate Coursework:** Machine Learning, Structured Models for NLP, Human Computation & Crowdsourcing, Natural Language Processing, Semantics, Distributed Systems, Advanced Operating Systems, Data Centers, Algorithms, Automated Logic Reasoning,

## PUBLICATION

---

- Jialin Wu, **Zeyuan Hu**, Raymond J. Mooney. “Joint Image Captioning and Question Answering” In *VQA Challenge and Visual Dialog Workshop at the 31st IEEE Conference on Computer Vision and Pattern Recognition* (CVPR 2018)
- Jialin Wu, **Zeyuan Hu**, Raymond J. Mooney. “Jointly Generating Captions to Aid Visual Question Answering”. (ACL 2019 *Oral*)

## SELECTED PROJECTS

---

- **RustFS** (2018 - ). Building a user-space file system that leverages NVMe SSD. [Rust](#), [SPDK](#)
- **Strata with Lease** (2018). Extended Strata file system with Lease mechanism to support concurrent file access across processes. [C](#)
- **HyperPebblesDB** (2018). Constructed a key-value store that is part of LevelDB family with focus on reducing write amplification. [C++](#), [CMake](#), [Autotools](#)
- **Distributed Key-Value Store** (2018). Built a distributed key-value store with [Python](#) that uses *eventually consistency* model with two session guarantees: *Read Your Writes* and *Monotonic Reads*.

## HONORS AND AWARDS

---

- 2018 **Best Internship Project Award (Software Engineering)**, Schlumberger
- 2017 **IBM Appreciation program for the Practice: Dare to create original ideas**, IBM
- 2016 **IBM Manager's Choice Award - Put the Client First**, IBM
- 2016 **IBM China Development Laboratory Hackathon - 2nd Place**, IBM
- 2014 **Graduation with Distinction**, University of Wisconsin
- 2013 **Honors Summer Sophomore Research Apprenticeship**, University of Wisconsin
- 2012 **Meek Bishop Scholarship in Economics**, University of Wisconsin
- 2010-2012 **Dean's List**, University of Wisconsin

## TEACHING

---

- CS386D Database Systems (Spring 2019, UT-Austin). Teaching Assistant
- EE382V Data Engineering (Fall 2018, UT-Austin). Teaching Assistant
- NEU466M Quantitative Methods in Neuroscience (Spring 2018, UT-Austin). Teaching Assistant
- M408K Differential Calculus (Fall 2017, UT-Austin). Teaching Assistant

## MANUSCRIPT

---

- **Zeyuan Hu** and Julia Strout. Exploring Stereotypes and Biased Data with the Crowd. arXiv preprint arXiv:1801.03261 (2018)

## RESEARCH EXPERIENCE

---

- |   |                   |                                   |
|---|-------------------|-----------------------------------|
| <b>Research Assistant</b><br>Prof. Vijay Chidambaram  | <b>UT-Austin</b>  | <b>August 2018 – Present</b>      |
| • Building a user space file system on top of NVMe SSD leveraging <a href="#">SPDK</a> library from Intel and <a href="#">Rust</a>  |                   |                                   |
| <b>Research Assistant</b><br>Prof. Emmett Witchel   | <b>UT-Austin</b>  | <b>April 2018 – December 2018</b> |
| • Used a cloud service benchmark ( <i>CloudSuite</i> ) to measure the performance penalty brought by encryption on the IPC between a web server (Nginx) and a PHP application in a local environment                                      |                   |                                   |
| • Measured journaling impact on the write amplification of various file systems using <i>filebench</i> (customized), <i>blktrace</i> , <i>iostat</i> , and <i>strace</i>  |                   |                                   |
| • Measured the write amplification of workloads from <i>filebench</i> and Git workload from <i>BetrFS</i> on file systems that are fragmented (i.e., <i>age</i> ), which is created from file system aging tool (e.g., <i>Geriatric</i> ) |                   |                                   |
| <b>Research Assistant</b><br>Prof. Vikas Singh  | <b>UW-Madison</b> | <b>May 2013 – April 2014</b>      |
| • Applied Spatial Gaussian Process & Dirichlet Process on fMRI data with <a href="#">MATLAB</a> and improved power of testing on predicting Dementia based upon pixel value of the scan by 5 %  |                   |                                   |

## **SERVICE AND SOCIETIES**

---

- UTCS Master Admission Committee (Jan 2018 – March 2018), Member
- IBM Diamond & Ring Toastmaster Club (Jun 2016 - Jun 2017), President
