## EDUCATION

---

- |  |                    |                             |
|--|--------------------|-----------------------------|
| <b>University of Texas</b>   | <b>Austin, TX</b>  | <b>Sept 2017 – May 2019</b> |
| <ul style="list-style-type: none"><li>• M.S. in Computer Science. (GPA: 3.81/4.00)</li></ul>   |                    |                             |
| <b>University of Wisconsin</b>   | <b>Madison, WI</b> | <b>Sept 2010 – Dec 2014</b> |
| <ul style="list-style-type: none"><li>• B.A. in Computer Science. (GPA: 3.74/4.00)</li><li>• B.A. in Economics with Honors. (GPA: 3.85/4.00)</li><li>• B.A. in Mathematics. (GPA: 3.81/4.00)</li></ul> |                    |                             |

## WORK EXPERIENCE

---

- |   |                                       |                                  |
|---|---------------------------------------|----------------------------------|
| <b>Cloud Architect Engineer</b>   | <b>State Street Financial Service</b> | <b>June 2019 – Current</b>       |
| Omnia storage team  |                                       |                                  |
| <ul style="list-style-type: none"><li>• Developed auto-deployment system of IBM Cloud Object Storage System on multi-site clusters</li><li>• Led development of a distributed workload generator and performance benchmark toolkit written in <u>Go</u></li></ul>   |                                       |                                  |
| <b>Software Engineer Internship</b>   | <b>Schlumberger</b>                   | <b>May 2018 – August 2018</b>    |
| HPC infrastructure team   |                                       |                                  |
| <ul style="list-style-type: none"><li>• Implemented a monitoring component of the in-house High-Performance Computing (HPC) engine in <u>C++</u> to provide the fault tolerance and handle the “straggler” problem</li><li>• Employed SGD algorithm to dynamically learn the best timing for backup executions of the in-progress tasks based on the computation task characteristics</li><li>• Built a <u>C++</u> code generator that automatically generates the application layer code based on the engine API</li></ul>   |                                       |                                  |
| <b>Software Engineer</b>  | <b>IBM</b>                            | <b>August 2015 – August 2017</b> |
| Db2 LUW federation team   |                                       |                                  |
| <ul style="list-style-type: none"><li>• Constructed <u>Hive</u> and <u>Impala</u> wrappers with <u>C++</u> and <u>Java</u> to support federation database between traditional RDBMS and Hadoop-based data warehouse solution</li><li>• Created automated setup tools with <u>Shell</u> that reduce product configuration time by 75%</li><li>• Enhanced server option optimization tools using <u>C</u> to reduce federation database performance tuning time by 90 % and enable the capability of tuning the product against Hive, Impala, and Spark</li><li>• Resolved over 20 defects, including a severe memory leak issue that impacted a \$1.6 million deal. <i>Awarded IBM Manager’s Choice Award 2016</i></li></ul> |                                       |                                  |

## SELECTED PROJECTS

---

- **RustFS** (2018 - ). Building a user-space file system that leverages NVMe SSD. Rust, SPDK
- **Strata with Lease** (2018). Extended Strata file system with Lease mechanism to support concurrent file access across processes. C.
- **HyperPebblesDB** (2018). Constructed a key-value store that is part of LevelDB family with focus on reducing write amplification. C++, CMake, Autotools
- **Distributed Key-Value Store** (2018). Built a distributed key-value store with Python that uses *eventually consistency* model with two session guarantees: *Read Your Writes* and *Monotonic Reads*.

## LANGUAGES AND TECHNOLOGIES

---

- **Languages:** C++, C, Python, Go, Rust, Shell, SQL, Java, Lisp, MATLAB
- **Software:** CMake, Autotools, Git, Docker, Ansible, QEMU, Tensorflow, Keras, ClearCase, Hive, Impala, Maven, Hadoop
